The game looks very good but the AI needs improvement.. Really good little game, thanks to French Stream Zerator, who make discover this game at his community :)

pew pew pew. Probably the best RPG of all time, highly recommend.. A well made Riichi Mahjong game with a good variety of rulesets to choose from. An easy to understand interface with audio and visual indicators make the game accessible even for people new to the game. The customizable color of the tiles and the board make for a good extra touch.

The biggest issue still seems to be just finding people to play the game online, even though the bot support is also available. Speaking of the bots, the AI could be a tad bit better, especially when playing with a mix of bots and real players.

Overall the game was a really nice idea, its hard to find a proper Riichi Mahjong game in English. Tenhou is a thing, but that's in Japanese only.. Weeeell, I don't really recommend this game. It has aged, but not exactly gracefully. It's not horrible either. But it just isn't really good either.

For 5\u20ac, it's too little. I bought it in the Popcap Bundle, so it was alright, I guess?

Still, for demanding 5\u20ac and then giving you relatively monotonous gameplay... it's too much money. It's just too much for so little actually happening. That's why I wouldn't recommend buying this game.

Oh, and just for the sake of completion: You play as one of four heroes to save the Iggles, a race of furry little creatures color-coded and caught in bubbles by some kind of evil force. Yeah. That's the sum of it. You move through a little labyrinth, collect the Iggles, avoid the baddies, and send the Iggles home with the appropriate home fields.

And... that's it. For 101 levels in Adventure mode. Yay.. The controller is bugged: it keep on running on the right side of the screen, making it impossible to play. Very Good, brings back spooky silent hill feelings. Controls are tight, puzzles are able to be figured out with the clues inside the game without being too easy. Overall would recommend to anyone who is a fan of old school horror games and owns a vr system.. Loving this game so far, the soundtrack is nice and the story is interesting :D. Pretty good for \$1.50

I waited a month to review this game but it seems like no update or changes will come anytime soon so I decided to write my review with my thoughts now.

Good things? Well I like the idea of the plot... and I like the simplistic art-style

Bad things? Well... Considering I have met a bug which makes it impossible to continue to story (seems like others have the same or similar issue). These type of bugs should be worked at to be fixed ASAP but the creators don't seem interested in fixing these type of problems.

Looking through their library of games they all follow similar patterns with similar complains and problems with their games. Don't bother with this one or any of their other games unless you'd like to take a gamble on whether or not you can finish it..
2V10

What a lovely idea for a game spoiled by something so simple. It chose a sucky resolution for me, and wouldn't let me change it. As a result, what should have been a beautiful experience looks like fuzzy pizza. DEVELOPERS: always let us choose our own graphics settings.. don't even waste a single penny on this pile of steaming horse♥♥♥♥♥♥♥♥. My interest in playing football games has decreased in recent years, mainly because of the ineptitude of my favorite team, the Cleveland Browns. I no longer a hardcore football gamer, but I still enjoy playing from time to time. I was interested in an alternative to Madden that features lots of modability, so I decided to invest in Axis Football.

The game still has a way to go to be comparable to even last gen football games, though it does play a reasonably fun game of football. If you're buying this game, you have to think of it as an investment in future versions where the developer is promising to bring in more features you'd expect in a current gen football game.

My only concerns is that for a game that is supposed to be very mod friendly, the modding community is nearly dead. The only available mods, NFL and NCAA rosters, were released when the game came out, but there has been next to nothing since. That's definitely been the most disappointing aspect to me. Also, the amount of news on updates from the developer has seemed to dry up as well, which makes me nervous that he has already stopped supporting this version to work on next year's.

I'm giving it a recommend because the bones are there for a good football game. Hopefully, a few more updates add in things like substitutions and more audio modding options and then next year we'll see a more robust game.. All I'm saying is... if vaccines keep us safe from diseases,

what's going to keep us safe from vampires?. After really liking Ebi-Hime's free VNs on Steam, I had high expectation for this one.

Sadly... This game never live up to them.

The main characters feels shallow, it's full of otaku references (a turn off for me) and the story is just... Totally not interesting. The humor really feels forced, the romance too.

I quite forced myself to finish it, in hope of seeing something interesting. Nope!

I can give some points for the cute drawings, the great food drawings AND descriptions. Other than that, meh.

The soundtrack is pretty forgettable too.. Honestly, I know a lot people have that \u2018You can\u2019t beat the classic\u2019 mentality and I totally get it! However, in this case, this one is better than the original. It keeps everything that made the original great and improves upon the intensity, visuals, violence, and sound to the point where it feels surprisingly real. Plus, a lot of scenes appear gloriously cinematic. And we\u2019re reintroduced to MacMillan, Soap, and Price! Woooo!

Sometimes the awesome music can't be heard over the chaos, and I felt some of the songs didn't need any tinkering.

8V10. Highly underrated family game love playing this with my daughter. Good benefit if you don't want your kids to go in VR because they're not old enough this is a way to interact with them. Hey good job devs. It's what you see: another platformer. If you didn't already guess, it's VERY heavily based off of the old school Donkey Kong games on the SNES as well as the current Donkey Kong Country Return game on the Wii. From the special stages, the music, sounds and even the areas you visit. This is seriously one of those budget games that parents buy kids when they can't afford the real deal so they get the cheap knock off game instead. Saying that, I still enjoyed the game. I played it from start to finish, got everything that mattered and have no intention on going back to play it again because there is nothing else after beating the game. I bought it in hopes it'd be a gem that was overlooked because of how childish it looked but alas, I gambled, I lost. Tis the fun in the betting world. Ah well~. A superb experience.

Snarky and cringe-worthy commentary for a game of orbits that you can play on NASA's website for free.
