## About This Game

VR Home is a sandbox game made for the HTC Vive based around building and designing your own virtual house or room. You can build, save and interact with your creations and homes.

## Features

- PLAY your favorite games on a large or small screen!
- INTERACT with the objects and the world around you!
- WATCH or STREAM your favorite youtube videos and movie files!
- LISTEN to your favorite music files or radio streams!
- BUILD anything from your real room, a gaming room, a production room, a disco room or even your nan's kitchen!
- CUSTOMISE everything about your house including the walls, the wallpaper, the floor or even the posters!
- REPLICATE real rooms using the wide variety of furniture!
- HUNDREDS of objects and furniture to choose from!

- 
- TONS of unique functions, from playing gameboy games, watching 360 videos, shooting guns or even shrinking yourself!

If there is any questions or suggestions please contact me at [vrhomegame@gmail.com](mailto:vrhomegame@gmail.com). 90% of the money earned goes back into developing the game further.

This is an underrated game, built more for a niche audience and only providing short bursts of play before getting tiresome. Space fans and those of the gaming community starving for a true successor to the Homeworld series might find some value out of the overly simplistic space combat.

Technically a rogue-like game a la Oregon Trail or Rogue Legacy, Weird Worlds' item collection and map generation keep you entertained for a time before you realize that each play session varies little compared to the next. The small amount of items and ships don't help it.

If you're starving for a good space combat sim, keep waiting.. Took about 8 hours to beat, not as good as Loren Amazon Princess but not bad either.

The alchemy mini game was fun for a short while and then it became tiresome, wasn't hard at all though. Don't freak out about days, you have plenty of time for everything.

. Minimized is a maze fps, this fps is really good, I'm not sure what happened in the sequel minimized 2, this is a far better game in my opinion, awesome chiptune and heavy metal music, melee weapon, better ui, I can say it was a really fun game.

- +awesome soundtrack
- +destructive environments
- +amazing gameplay

10/10. The graphics aren't the best and the voice acting is pretty bad but the sound, lighting and pacing will really get to you setting this up to be a pretty scary and well made horror game!. It looked so promising in the pictures then it's all down hill from then .it got to be a 1 for effort out of 10 .at one point the floor texture just went to black n white even into the mountains .one ride as it went around the floor texture comes into the cab .

If the person or company just had taken more time it could had been great.ps the only ride that does look good the tcup, worst ride is Iver bumper cars you can't control or the house of horror that is not even a 1/2 out of ten .it's not worth spending your money on until it had a lot of work done

---

The game doesn't work !!

It always crashes and many people have the same issue...Don't buy it. Even if I like Clicker games, the overheating system looks pretty cool to stop auto clicker or spam but progression is pointless

Choice gives nothing special, you will lose all your progression often, save are bugged, would not advise this game to any of my friends. There is A LOT of game here for \$2.50 CAD. I'm five hours in and I'm not even halfway through the campaign. There's a neat gameplay element where you get a rhythm of defending then attacking, which I haven't encountered outside of this game before. It's not flawless, but if you've got a few bucks on your account, you could do much, much worse than spending it here.. I was so happy when I got to see that this game will come to steam. I still own the old original cd-rom version, even though it is unplayable due to scratches and once in a while I tend to pick this game up on Scumm to play it again, even though I know every little dialouge and all the riddles.

This is a great game with great humor, great puzzles, loveable characters and enjoyable soundtrack. This was the first game in my life I ever got to play and finish. It brings back great memories of self drawn maps and being forced to remain stuck on riddles for ages because you could not ask the internet for the solutions.

I really do recommend the game itself, because it is just awesome, but... I don't recommend this version.

- the new cursors are cancer to the eyes
- the "new" graphics look like \u2665\u2665\u2665\u2665\u2665\u2665 compared to the original pixel-graphics

If you can look over the \u2665\u2665\u2665\u2665\u2665 new cursors and be happy with changing all the "new" features back to "classic playmode", then go and get this gem. If this would hurt your eyes too much, look out for the Scumm version.

I would have gladly paid for this game in its original version, but being told it is a great 25th anniversary version that is just \u2665\u2665\u2665\u2665\u2665\u2665t and take money for it.. it is kind of a rip off. :<. This game is amazing. Review bombers need to get their head out of their\u2665\u2665\u2665\u2665. Epic Strings indeed. Very good quality of sound, worth their money.. This feels very much like an early beta and is very nearly unplayable.. This game is NOT GOOD! Do not get this game! There is almost no sounds except the music. There is also no variety of units. I can't really describe how bad it is, but it is bad.. Cleared the entire map. I still get the message I still get this message: "You've called for help! But there are still Zombies spotted in the area! Clear them out!". So the game is currently unbeatable for me.

It was fun until I realized this. I may change my answer to "Yes" if this gets fixed and I happen to get the motivation to play this again.

. you can actually suck on my balls if you haven't read this
